

About AAM investment Group

AAM is a large-scale, wholly Australian-owned operator and provider of strategic investment, asset management and operational management services to Australia's agricultural industry. At the heart of the AAM business is a belief in the strength and long-term performance of Australian agriculture.

Our national team spans five states and territories and includes more than 500 employees across 30 assets. We manage assets in multiple agricultural sectors including beef, sheep, poultry and sustainable softwood timber processing. Our vision is to promote investment that leads change in the agricultural industry to create a positive and sustainable legacy.

About the role:

The opportunity exists for a Station Manager, who is driven to deliver a robust commercial outcome. The successful applicant has demonstrated effective leadership in sound safety, animal welfare and production, people management, delegation of responsibility and business acumen. The Station Manager is responsible for the management of personnel, assets, operations, and financial performance of a large-scale cattle station in the Northern Territory. This role encompasses a diverse range of agricultural practices including cropping, spelling and feedyard operation. Maryfield Station is just off the Stuart Highway with all-weather, year-round access, only a short drive from Daly Waters and with Katherine a few hours away to the north. Maryfield Station is located on 147,300 hectares and has 17,000 head of cattle.
